

NETWORK ATTACHED STORAGE USING WINDOWS PC

1. Go to drive in your PC & select the folder you want to share.
2. Give the permission to be shared among others by going to properties.

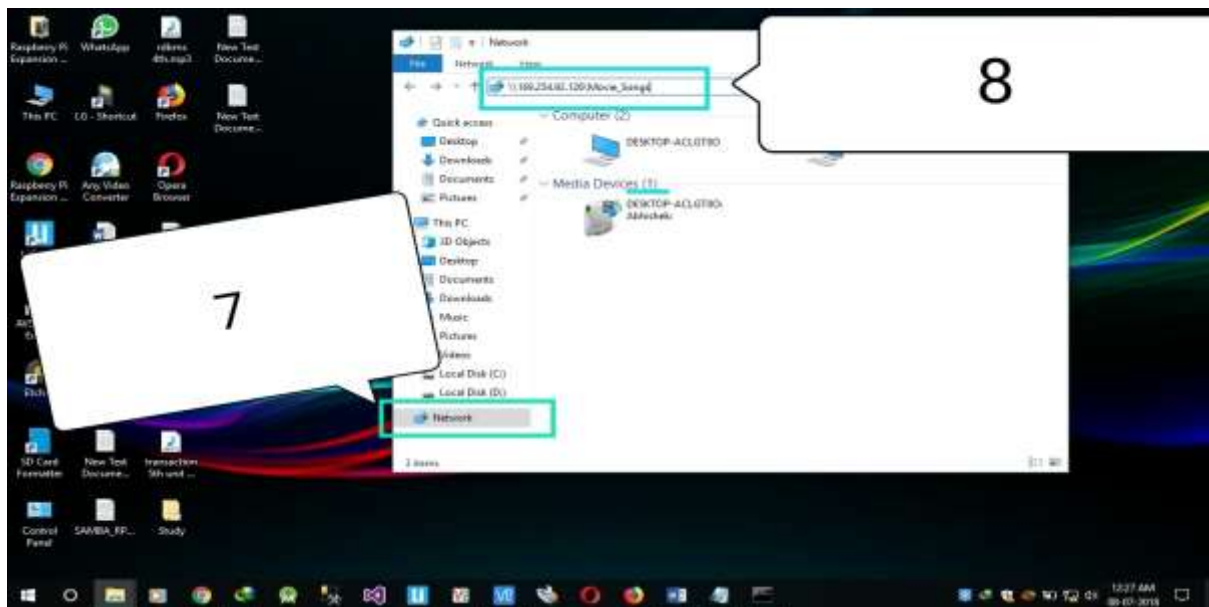

3. Find the ip of your PC from command prompt (ipconfig)

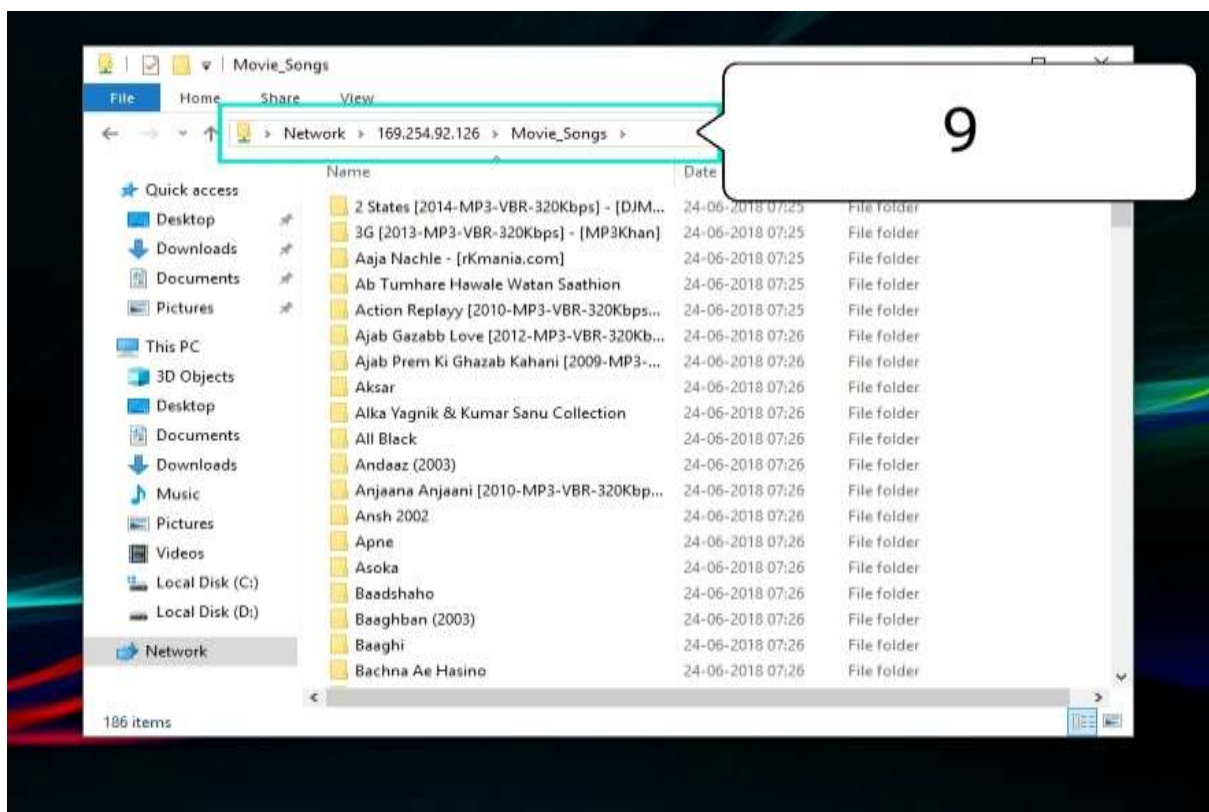

4. Now Open Network in Left_bottom from This_PC

5. Paste the address as shown

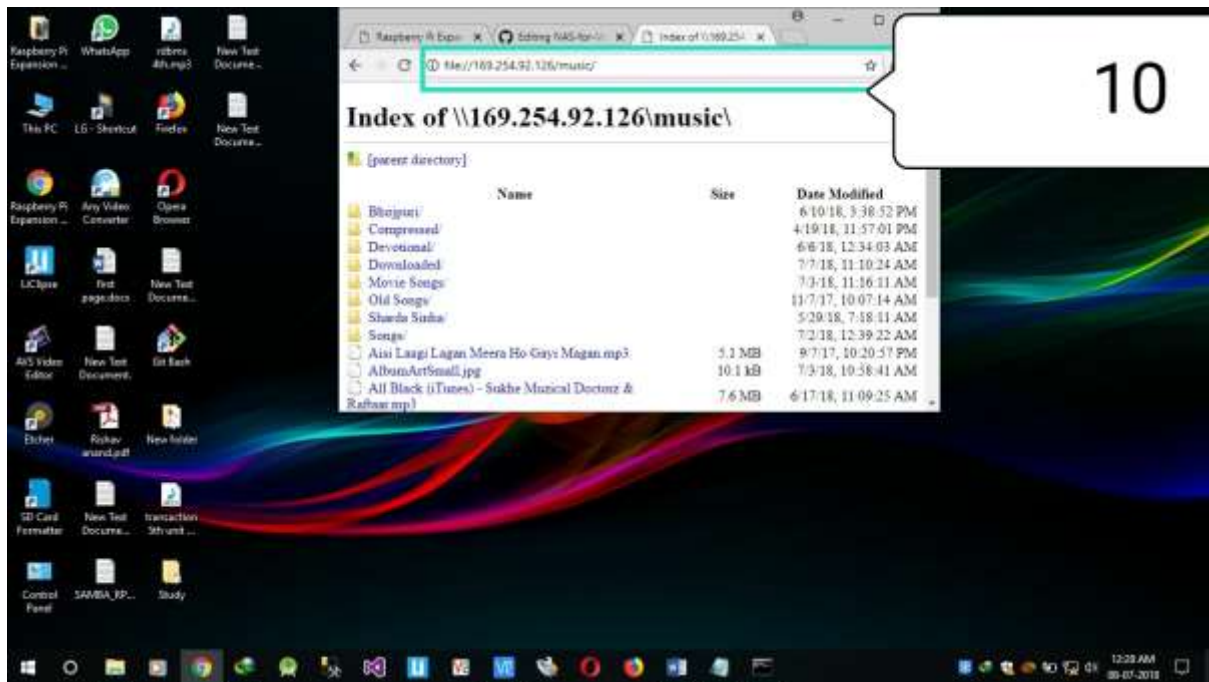

i.e. \\ 169.254.92.126/Movies/

6. Try to access the folder/files by address in web browser:

\\ip_address\folder_name

for example- \\ 169.254.92.126/Movies/

7. Now Open the Location you want to access NAS

8. Now you will see the set of Folders there you shared

9. Right click on the folder and choose properties and copy ip address and paste in NAS ip address

i.e. 169.254.92.126

Note-don't put \\

10. Copy the folder location that you want to access

i.e. Movies\English_folder

11. In case asked to login, just give the user name and password of your PC
